CRASH GATE SYSTEMS™ @ K4-K8-K12 / M30-M50

Jamieson Manufacturing Co. and Logical Decisions Inc. have teamed up with engineered and tested solutions to fit your high security needs. The CGS system has been crash tested on a 24' gate opening and certified to M50-P2 as per ASTM F2656-15. No matter the crash rating required, Jamieson and LDI can engineer your project.

CRASH GATE SYSTEMS™ @ K4-K8-K12 / M30-M50

CRASH GATE SYSTEMS™	TYPICAL USE
TRUSTRAC™ 3000-CGS	CANTILEVER
POWERTRAC™ 4000-CGS	BOX FRAME CANTILEVER
VALUTRAC™ 3500-CGS	V-TRACK SLIDE
I-TRAC™ 6300-CGS	OVERHEAD I-BEAM

A BETTER HIGH SECURITY GATE SYSTEM

Utilizing Jamieson's proprietary gate products and our unique cable and arresting systems, CGS gate systems are fabricated and fully welded under factory controlled conditions. These gates ship ready for immediate installation with hardware for manual operation Automation equipment optional.

- Gate
- Superstructure
- All Hardware
- Cable systems
- Locking Column
- Latch/Bollard posts
- Automation

CRASH GATE COMPONENTS

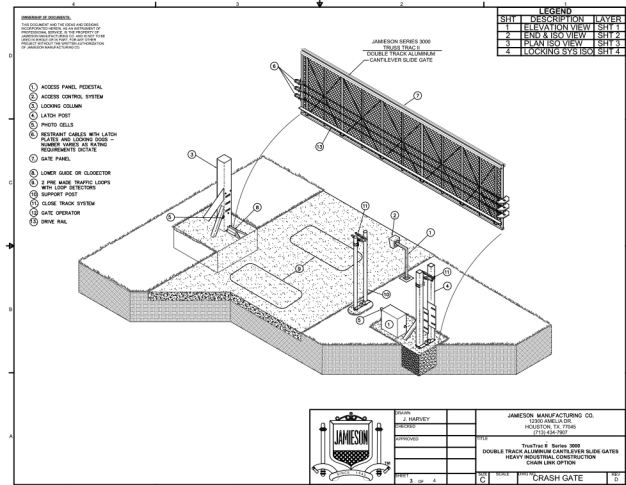

- Proprietary cable with increased energy absorption.
- Heavy wall steel tubing
- Reinforced plate in locking column
- Mechanical lock, 24V solenoid release.
- Simple mechanical release by keyed access door.
- Positive lock of cables into latch posts.
- Manual or integrated release with access controls.
- Reinforced latch post and rear dogs.

BALANCED, RUGGED AND DURABLE

Jamieson has teamed with Logical Decisions Inc (LDI) to combine complementary engineering, fabrication and integration capabilities. The result is one product that arrives at the job site fit for use and a secure location.

Jamieson's proven line of rugged and durable gate systems are adapted and enhanced for the demands of crash gate applications. All integration is performed at the factory for simplified installation and reliable performance.

The LDI cable and locking system design is fundamental engineering at it's best. Their proprietary cable and robust arresting methods provide the energy absorption necessary with very simplified locking and release methods.

Submittal drawings provided by Jamieson. Job Specific drawings available on request.

ORNAMENTAL AND CUSTOM FILLER MATERIALS

From chain link to ornamental to anti-cut/anti-climb, your choice of filler materials.

QUALITY FABRICATION

Our manufacturing operations are certified to AWS D1.1/D1.1M and D1.2/D1.2M and provides the technological and manufacturing expertise for custom applications.

OUR COMMITMENT TO YOUR SAFETY

LDI follows the standards developed by Underwriter's Laboratory (U.L. 325) and ASTM F2200 as developed by ASTM International for all TrusTrac™ gates, regardless of manual or automated applications.

WARRANTY

LDI provides a 2-year limited warranty on CGS gate systems.
