

**IQ** *Intelli-Slide*

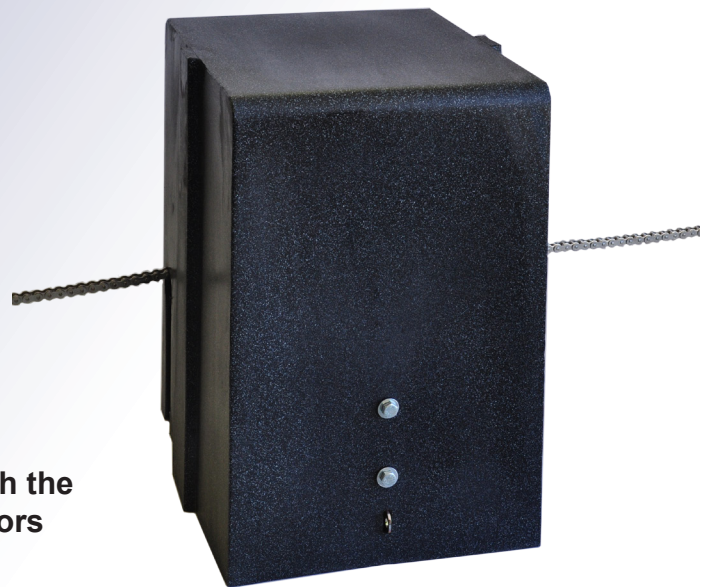

**High torque 24 volt DC motor** provides unprecedented power to move large gates.

**Solar capable.** With the correct solar panel size and battery package, AC power is not required.

**Easy installation with cost saving features.** With the use of the IQ Control Board, the “Intelli” series operators last longer and are more profitable to install.

**Digitally displayed parameters** and programmable settings are easily viewed on the backlit LCD display. More programmable options than any other operator.

**The “Intelli” Series operators** are the *intelligent* choice for gate automation professionals.

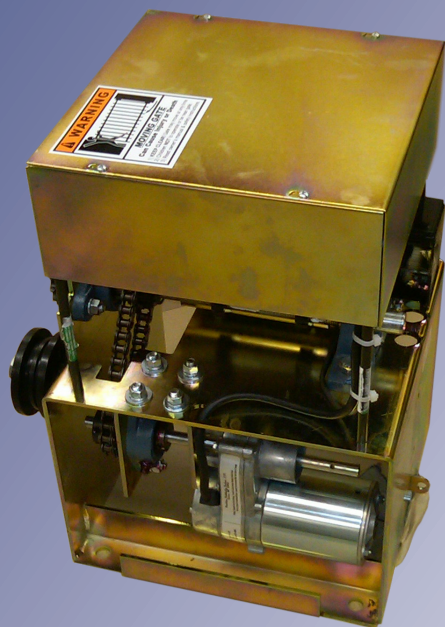

**IQ GATE SYSTEMS**

The Leader in Gate Automation

# Highest Quality

# Intelligent Choice

The Intelli-Slide 5000-S offers standard features that are unmatched by the competition. For 5 years, the Intelli-Slide 5000-S has been setting the standard in slide gate automation. Utilizing the IQ Control Board, the Intelli-Slide 5000-S provides variable speed operation and unprecedented programmable options. With the high torque 24 volt motor, the Intelli-Slide 5000-S can accommodate gates weighing up to 1500 lbs.. ETL listed: UL325 and UL991.

Intelli- Model	Intelli-Slide 5000-S	Intelli-Slide 5000-HD
Motor Voltage	24 Volt DC Motor	48 Volt DC Motor
Operating Duty Cycle	Continuous Duty	Continuous Duty
Power Input	115/230 Single Phase	115/230 Single Phase
	208/230 Three Phase	208/230 Three Phase
	Solar	Solar (Restricted)
UL Class	1,2,3,4 -- ETL Listed	1,2,3,4
Warranty	3 Years	3 Years

- On board programmable radio receiver
- Plug in loop detector slots
- Inherent entrapment protection
- Programmable variable speeds
- Digitally displayed options and settings
- Built in 7 day open timer and security timers
- Programmable inputs and outputs

**Battery Backup Cycles: Over 200\***  
**Operating Temperature: -15 to 150**  
**Gate Length: Up to 35 Feet**  
**Gate Weight: Up to 1500lbs**

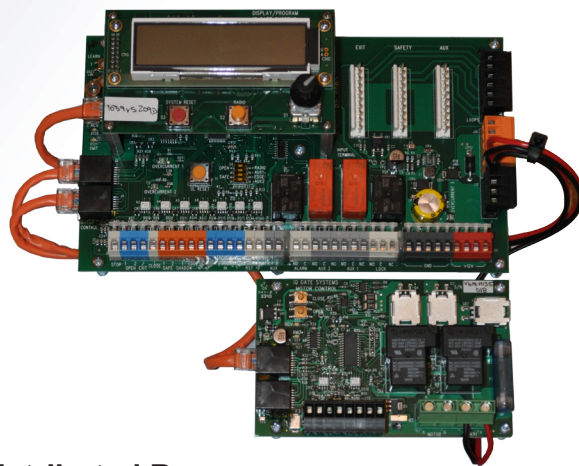

(\*) Depends on size of gate and accessories
