# POWER WHEEL SERIES

## solid steel v-groove wheels

The 4", 5" and 6" steel wheels are manufactured by a computer controlled lathe machine and made from solid, cold rolled steel. These wheels are designed for high traffic commercial sliding gate track applications. They can be used on heavy gates and never require any maintenance (there are no grease fittings). Power Wheels are 30% more efficient in torque transfer from wheels to operator than other wheels such as cast iron or plastic. The choice for your high traffic gates is simple ... "Power Wheels".

### power wheel FEATURES

**Cold rolled, solid steel V-Groove wheel**

**Designed for 1" or larger angle tracks**

**Continuous cycle operation**

**Require no maintenance**

**Finished with gold zinc plating**

MODEL: A H108

#### 4" Power Wheel

- Weight capacity: 3,000 lbs. each wheel
- Shipping weight per wheel: 5 lbs.
- Two 2" sealed bearings with 1" axle
- Includes: One .5" x 3.25" bolt with nut

MODEL: A H115

#### 5" Power Wheel

- Weight capacity: 4,000 lbs. each wheel
- Shipping weight per wheel: 8.5 lbs.
- Two 2" sealed bearings with 1" axle
- Includes: One .5" x 3.25" bolt with nut

MODEL: A H110

#### 6" Power Wheel

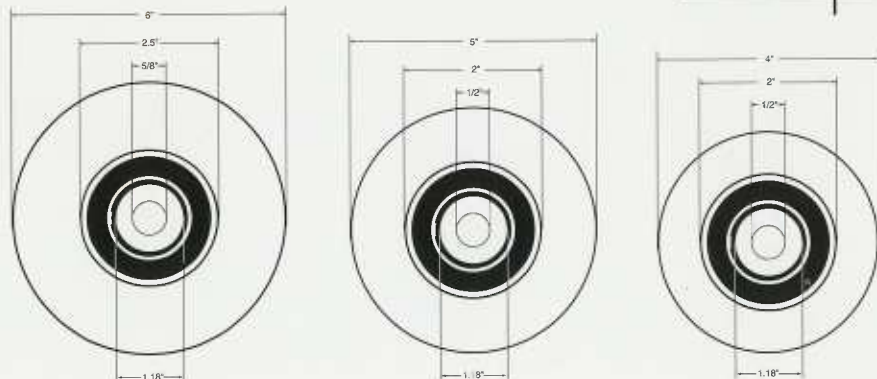

- Weight capacity: 5,000 lbs. each wheel
- Shipping weight per wheel: 12.5 lbs.
- Two 2.5" sealed bearings w/ 1.18" axle
- Includes: One .625" x 3.25" bolt w/ nut

**A H103**

Optional mounting brackets  
Dimensions: 4" x 6 1/2" x 1/8"

### DIMENSIONS

# UHMW WHEEL

Elite also offers a compact nylon, UHMW wheel for v-groove applications. These heavy duty plastic wheels are manufactured by Elite for lighter sliding gates.

MODEL: A H102

## SPECIFICATIONS

- Compact nylon - non-breakable - uhmw
- Designed for 1" or larger angle tracks
- Two - 1.5" pregated bronze bushings
- Includes: one -1/2" x 3 1/4" bolt w/nut
- Weight capacity: 750 pounds each wheel
  - Operation: continuous cycle
  - Maintenance: none
  - Finish: non-corrosive uhmw
- Shipping weight per wheel: 1.5 lbs.

MODEL: A H112

4" Power Wheel 2

- Weight capacity: 3,000 lbs. each wheel
- Shipping weight per wheel: 5 lbs.
- Two 2" sealed bearings with 1" axle
- Includes: One .5" x 3.25" bolt with nut

MODEL: A H117

5" Power Wheel 2

- Weight capacity: 4,000 lbs. each wheel
- Shipping weight per wheel: 8.5 lbs.
- Two 2" sealed bearings with 1" axle
- Includes: One .5" x 3.25" bolt with nut

MODEL: A H113

6" Power Wheel 2

- Weight capacity: 5,000 lbs. each wheel
- Shipping weight per wheel: 12.5 lbs.
- Two 2.5" sealed bearings w/ 1.18" axle
- Includes: One .625" x 3.25" bolt w/ nut

## power wheel 2 FEATURES

**Cold rolled, solid steel V-Groove wheel**

**Heat treated for long life**

**Continuous cycle operation**

**Require no maintenance**

**Finished with silver zinc plating**
